

# YOUR CONSULTATION

Should you feel another consultation is necessary to gather more information from the doctor and staff, an additional visit will be scheduled at no charge. When you decide to move forward with surgery, a preoperative visit will be scheduled no less than two weeks prior to surgery. You will receive preoperative and postoperative instructions as well as your prescriptions at this visit. Bringing your caregiver to the preoperative visit is a great idea allowing them to be prepared as well.

Dr. Short believes in healthy, consistent, skin care. If you have questions about dry, oily skin, acne, post-menopausal skin changes, or just desire to meet with one of our aestheticians to discuss your skin care needs, one of them can talk with you during your consultation. Our aestheticians perform skin tightening procedures with laser, thermage, or chemical peels. We also offer procedures such as laser hair and tattoo removal, permanent make-up, tinting and waxing.

Please understand your initial visit may last between 1.5 to 2 hours. Making an informed decision regarding surgery requires time and attention. Consultation times may vary depending upon the type and number of procedures under discussion. We recommend you call prior to your visit to confirm the office is running as scheduled.

Dr. Short and her team strive to provide patients with the best care in cosmetic plastic surgery. Our staff takes pride in being knowledgeable, compassionate, and available for our patients. All patients are given Dr. Short's home phone number after their surgery. Our goal is to make your plastic surgery experience as comfortable and pleasant as possible. We look forward to meeting you!
