

Kimberly K. Short, M.D., F.A.C.S.

Biographical Synopsis

We appreciate your interest in our practice and would like to introduce you to Dr. Kimberly Short and her unique approach to plastic surgery.

Dr. Short, born in 1964 and raised in Indiana, attended Indiana University School of Medicine. She completed her general surgery and plastic and reconstructive surgery training in Michigan and has been operating since 1990.

Being a perfectionist, she was drawn to plastic surgery as her surgical specialty. Because cosmetic surgery, a very specialized part of plastic surgery, changes rapidly, Dr. Short felt that obtaining additional training, specifically in cosmetic surgery, would benefit her patients. She completed several fellowships with experts in the field of cosmetic surgery to learn the most advanced techniques.

These fellowships, dedicated to aesthetic surgery, allowed her to learn the safest and most modern techniques. The first fellowship included cosmetic surgery of the entire body with special emphasis on eyelid surgery and the second concentrated on facial cosmetic surgery.

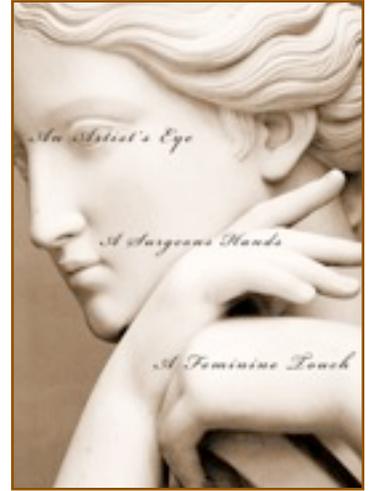

She also trained with national experts in the fields of laser surgery, skin care, chemical peeling and endoscopic surgical techniques for the face and breast. Her international experience includes visiting surgeons in France, England and Scotland and spending time at the Moorfield Eye Hospital in London, where she learned additional techniques in oculoplastic (eyelid) surgery.

As a Board Certified Plastic Surgeon and Diplomate of the American Board of Plastic Surgery, Dr. Short is also a member of the American Society of Plastic Surgeons, The American Society for Aesthetic Plastic Surgery, Midwest Association of Plastic Surgeons, Indiana State Medical Association, Indianapolis Medical Society, Fellow of the American College of Surgeons, and a Fellow of the International College of Surgeons.

She has presented her research at national and international meetings and has written articles on breast, eyelid and nasal surgery. She has also received special recognition for her work in breast surgery.

She not only speaks at national meetings but also attends regularly to stay current on the latest techniques in plastic surgery. Dr. Short is a member of the National Education Foundation for Botox® and her practice is recognized as a national training facility.

Having undergone cosmetic surgery herself, Dr. Short can relate to patients and their recovery process from personal experience. As a mother, she understands the many changes women experience throughout life. Dr. Short has four children, plays soccer, and enjoys reading and decorating, as well as outdoor activities
